LAB REPORT

Experiment No : 02
Course Title : Operating System
Course Code : CSE 210
Experiment Name : Basic Shell Scripting

Submitted By:

Name : Luckman Rafique
ID No : 20255103042
Intake : 55
Section : 02
Program : B.Sc. in CSE

Submitted To:

Name : Mahbuba Habib

(Lecturer)
Dept. of CSE
**Bangladesh University of Business
& Technology**

Date of Submission : 24/09/2026

Question 1. Take two numbers as input from the user and print the addition of the given numbers.

Steps To Solve –

- Open Unix Shell (here git bash is used)
- First create a folder named “task-2”.
 - `mkdir task-2`
- Go inside the task-2 folder.
 - `cd task-2`
- Create a shell script named addition.sh.
 - `touch addition.sh`
- Open the addition.sh file using vi.
 - `vi addition.sh`
- Write the required Shell script code and save the file.
- Give execute permission to the file.
 - `chmod u+x addition.sh`
- Run the Shell script.
 - `./addition.sh`
- Enter the first number 9 and second number 6.
- The program calculates and displays their addition as 15.

CODE –

```
echo Enter first number:
read a
echo Enter second number:
read b

echo =====
echo The addition of the given numbers are: $((a+b))
echo ----- welcome -----
```

Output –

```
User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task (main)
$ mkdir task-2

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task (main)
$ cd task-2

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task/task-2 (main)
$ touch addition.sh

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task/task-2 (main)
$ vi addition.sh

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task/task-2 (main)
$ ./addition.sh
Enter first number:
9
Enter second number:
6
=====
The addition of the given numbers are: 15
----- welcome -----

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task/task-2 (main)
$
```

Question 2. Take weather, date, and temperature in Celsius as input from the user. Print the output showing weather, date, and temperature in Kelvin.

Steps To Solve –

- Open Unix Shell (here git bash is used)
- Go inside the task-2 folder.
 - `cd task-2`
- Create a shell script named addition.sh.
 - Touch temp.sh
- Open the temp.sh file using vi.
 - `vi temp.sh`
- Write the required Shell script code and save the file.
- Give execute permission to the file.
 - `chmod u+x temp.sh`
- Run the Shell script.
 - `./temp.sh`
- Enter the weather as Rainy, date 23-09-2026 and temperature as 30 degree celsius.
- The program displays the weather and date and converts the temperature from Celsius to Kelvin.
- The program calculates and displays the temperature as 303 Kelvin.

Code –

```
MINGW64:/e/#!/Journey-Towards-Growth/Semester 5/Databa...
echo Enter weather:
read w
echo Enter Date:
read d
echo Temperature in celsius:
read t

echo =====
echo weather : $w
echo date : $d
echo Temperature in Kelvin unit: $((t+273))

echo ----- welcome -----
```

Output –

```
MINGW64:/e/#!/Journey-Towards-Growth/Semester 5/Databa...
User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task (main)
$ cd task-2

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task/task-2 (main)
$ touch temp.sh

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task/task-2 (main)
$ vi temp.sh

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task/task-2 (main)
$ chmod u+x temp.sh

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
Database System/Lab Task/task-2 (main)
$ ./temp.sh
Enter weather:
Rainy
Enter Date:
23-09-2026
Temperature in celsius:
30
=====
weather : Rainy
date : 23-09-2026
Temperature in Kelvin unit: 303
----- welcome -----

User@DESKTOP-F308A5A MINGW64 /e/#!/Journey-Towards-Growth/Semester 5/
